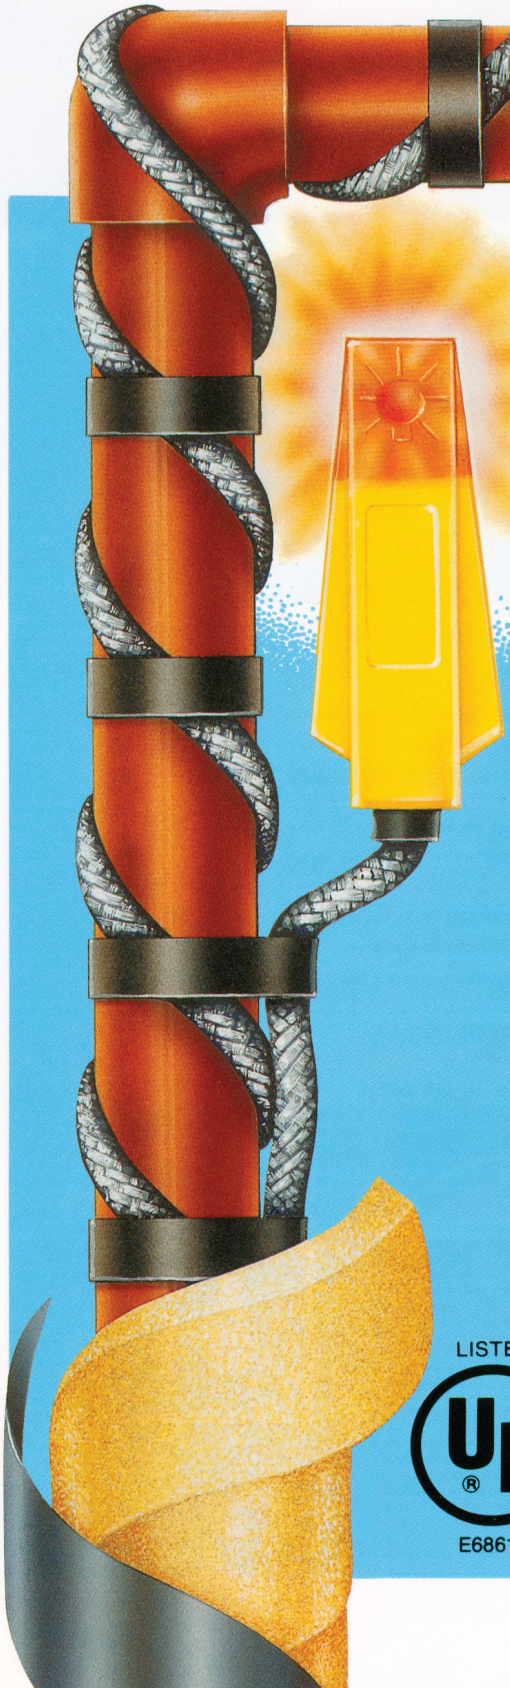
PIPE-GUARD

Self-Regulating Pipe Heating Cable

with Wrap-On

Performance Monitor Technology



Finally there is a self-regulating pipe heating cable that tells you its working. With Wrap-On *Performance Monitor Technology* you have a lighted end cap which shows that the cable is operating. There's no need to crawl into a cold, dark crawl space or under a mobile home to check your cable. Just look for the light! Nothing could be easier or more convenient.

Isn't it time to see the light?

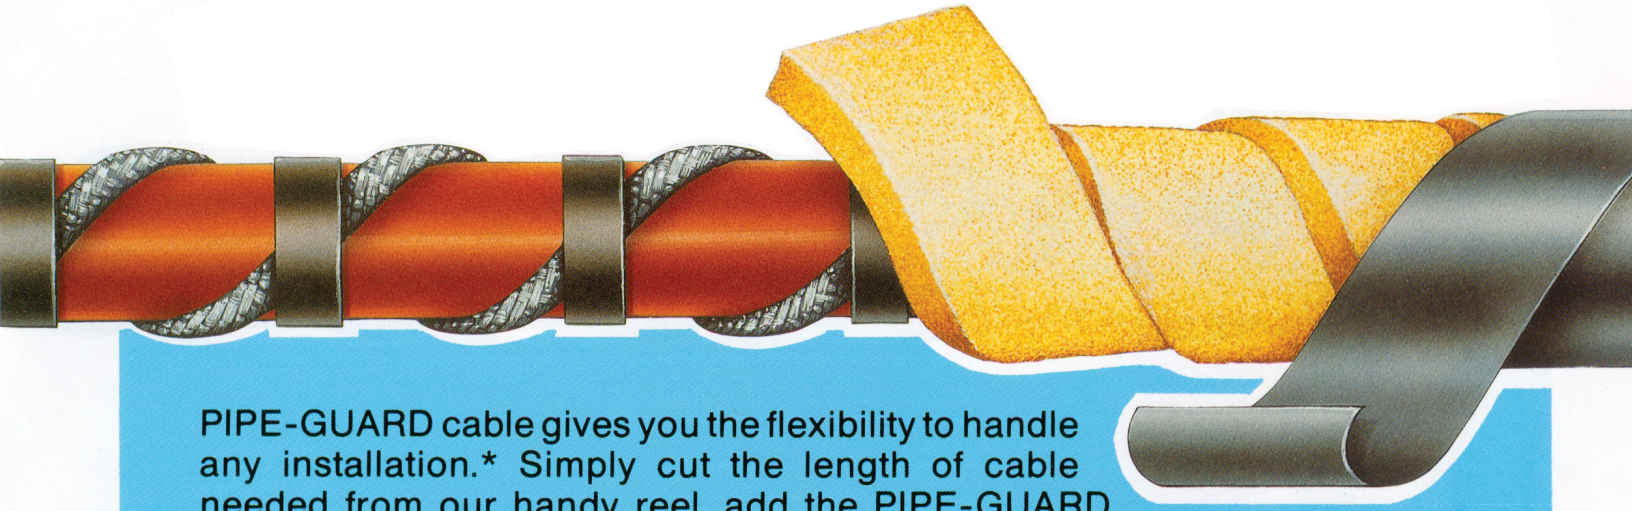
Pipe Freeze Protection

PIPE-GUARD

Self-Regulating Pipe Heating Cable



PIPE-GUARD cable gives you the flexibility to handle any installation.* Simply cut the length of cable needed from our handy reel, add the PIPE-GUARD fused plug and lighted end cap and install. The self-regulating cable design reacts to changes in temperature along the entire length of the cable, generating just the right amount of heat needed in each spot.
*Maximum circuit length is 50 ft.

PIPE-GUARD Features:

- Lighted End Cap with Wrap-On *Performance Monitor Technology*
- Tri-lingual packaging & instructions
- For use on metal & plastic pipe
- For use on both water supply & waste pipes
- Self-Regulating feature allows cable to vary the amount of heat produced
- Only a screwdriver & wire cutters are needed for installation
- UL listed
